

VIRIDIS

Antibacterial & Antiviral Handrub

Our unique benefits:

- 99.999% effective
- 100% biodegradable
- Water based
- Offers broad spectrum efficacy against bacteria and enveloped/non-enveloped viruses
- Long lasting protection with residual efficacy of up to 4 hours
- Unique foamer dispenser provides many more applications than a gel or spray equivalent
- Gentle on hands due to innovative formula containing natural Chitosan (Mushroom) and is suitable for sensitive skin
- Halal approved
- Colour, fragrance and alcohol free
- Non flammable

Suitable for use on sensitive skin

Available as a 50ml foamer, 500ml foamer and 5litre refill

Instructions for use

Dispense enough product to coat hands. Rub hands together thoroughly, taking care to rub between fingers and fingernails.

Allow to air dry.

Chemical-Physical Data:

Form	Liquid
Colour	Colourless to slightly yellow
Specific Density	1.0 g/cm ³ at 20C
pH	2.5 – 4

Active Ingredients:

- Lactic Acid 0.97% w/w
- Phenoxyethanol 2.6% w/w

Efficacy Testing Summary

Viridis Handrub is a water based, alcohol free, 100% biodegradable disinfectant intended for disinfecting visibly clean hands. Clinically tested for use on sensitive skin.

Viridis Handrub provides broad spectrum efficacy and has been independently tested in accredited laboratories to a range of European Standards (EN) according to EN 14885:2015 for hand hygiene disinfectant, including EN 1500 (hygienic handrub), EN 13727 (bactericidal activity in medical area) and EN 14476 (virucidal activity).

Microorganism	Testing Standard	Contact time	Test Concentration
Bactericidal			
Pseudomonas aeruginosa	EN 13727	1 min	6.5%
Enterococcus hirae	EN 13727	1 min	6.5%
Staphylococcus aureus	EN 13727	1 min	6.5%
Escherichia coli	EN 13727	1 min	6.5%
Escherichia coli	EN 1500	1 min	6.5%
Virucidal			
Vaccinia Virus	EN 14476	2 mins	6.5%
Vaccinia Virus	EN 14476	5 mins	3%
Murine Coronavirus	EN 14476	5 mins	3%

74 hour Repeat Open Application Patch Test for Cutaneous Irritancy on Sensitive Skin
